

THE UNIVERSITY OF
SYDNEY

We invite you to attend the **Plant Breeding Institute Field Day**

60 years of Sydney University field trials based at Narrabri

Please join I.A Watson Grains Research Centre staff in conjunction with the Sydney Institute of Agriculture for our annual field day encompassing the theme “Yield”.

Highlights will include discussions of new hybrid wheat breeding research by Professor Richard Trethowan plus the launch of a new Faba Bean variety developed by the University’s Faba Bean breeding program and the release of a new AGT wheat variety.

The day will conclude with a complimentary BBQ and refreshments from 4:30pm, kindly sponsored by Australian Grain Technologies.
