

IA Watson Grains Research Centre Narrabri Field Day 2014

**Wednesday 10 September 2014
9 am–5 pm**

Featuring presentations from agronomists, researchers and breeding companies on two major themes:

Crown rot and water use efficiency/heat tolerance

Hear about the agronomic issues, new releases coming through from breeders to address these agronomic issues and the research that is underpinning genetic improvement.

Other research on display will include Faba Bean and Field Pea breeding, grain quality research and soil biology work.

Morning tea, lunch and closing drinks provided by AGT.

RSVP 1 September 2014
